

### **Amendment to the pre-registration (uploaded on September 10, 2020)**

As of October 13, 2020, all datasets have been put together and some errors in the previous pre-registration regarding the scales in each dataset are noted below:

- Appreciation in Relationships scale (Gordon, Impett, Kogan, Oveis, & Keltner, 2012) assessing gratitude used a 5-point scale in the Berkeley Couples Study.
- Satisfaction and commitment were assessed with Perceived Relationship Quality Components Inventory (Fletcher, Simpson, & Thomas, 2000) in the Self-Expansion Study and Sex & Touch Study.
- Commitment was not assessed in Toronto Couples Study.
