

Codebook for the CAMA dataset: Simple Arithmetic Competences

Name	Label	Value labels	Missing	Scale
<i>report_ID</i>	uniquely identifies a report			numeric
r_author	Name of first author			string
r_year	publication year			numeric
r_apas	short citation			string
r_peer	indicates whether study is from a peer-reviewed publication	no, yes		factor
<i>sample_ID</i>	uniquely identifies a sample			numeric
s_meanage	mean age of sample in days			numeric
s_infant_type	development characteristic of experiment participants	typical, atypical		factor
t_response	way of measuring response in the experiment	behavior, eye-tracking, looking, physiology, other		factor
t_exposure	type of pre-test exposure phase	conditioning, habituation, familiarization, test_only		factor
t_method	method used, names as commonly used in the literature	see separate tab		factor
t_dep_measure	type of dependent measure used in experiment	see separate tab		factor
<i>outcome_ID</i>	uniquely identifies the outcome of a treatment			numeric
o_ni	Sample / group size			numeric
o_m1i	mean (first group or time point)			numeric
o_m2i	mean (second group or time point)			numeric
o_sd1i	standard deviation (first group or time point)			numeric
o_sd2i	standard deviation (second group or time point)			numeric
o_ri	Raw correlation coefficient			
o_measure	Outcome measure	see separate tab		factor

o_part_design	indicates the groups that are the comparison of interest for effect size	between two groups of participants, within_two (one group, two measurement points), within_one (one group, one measurement point)	factor
o_d_calc	Cohen's d		numeric
o_d_var_calc			numeric
o_g_calc	Hedges's g		numeric
o_g_var_calc			numeric
