

Table 1. Means, Standard Deviations (in Parentheses) and Inter-Correlations.

Variable	Scale	Mean (SD)	Correlations					
			1.	2.	3.	4.	5.	6.
1. Punishment	0,1	29.71%						
2. Punishment Investments	$\geq 0$ , in Cents	25.27 (68.96)	.57**					
3. Relative punishment investments	0 -100	4.61 (12.88)	.55**	.93**				
4. Contributions	0 - 400 Cents	275.14 (144.57)	.16**	.04	.11			
5. Averaged difference of contributions	+/- 400 Cents	3.75 (168.89)	.27**	.13*	.24**	.88**		
6. SVO angle	In degree (+/- 180)	25.55 (13.88)	.01	-.05	-.02	.15*	.12*	
7. Honesty-Humility	0-5	3.53 (0.67)	-.11	-.13*	-.10	.07	.06	.26**

*Note.* <sup>+</sup>  $p < .1$ , \*  $p < .05$ , \*\*  $p < .01$  (two-sided). SVO = Social Value Orientation. For the binary variable ‘Punishment’ we report point-biserial correlations. Numbers of observations for (1)-(4)  $N = 276$ , for (5)-(6)  $N = 275$ .
