

### **Codebook for example data**

The data files BSI\_data and DSQ\_data each contain a variable resptype (A = a selection from the population sample; B = a selection from the clinical sample).

Furthermore, they contain items scores: the 53 BSI items of the General Severity Index or total score (BSI01 to BSI53) and 16 items of the Distress scale of the 4DSQ (DSQ17, DSQ19, DSQ20, DSQ22, DSQ25, DSQ26, DSQ29, DSQ31, DSQ32, DSQ36, DSQ37, DSQ38, DSQ39, DSQ41, DSQ47, and DSQ48).
